We have three versions of HP2-I74 practice questions for you to choose: PDF version, Soft version and APP version.

**NEW QUESTION: 1A.** Option CB. Option BC. Option DD. Option A**Answer: B**

**NEW QUESTION: 2A.** Option CB. Option BC. Option DD. Option A**Answer: B**

**NEW QUESTION: 3**Which two modes of operation does BFD support? (Choose two.)**A.** passive mode**B.** echo mode**C.** aggressive mode**D.** asynchronous mode**E.** demand mode**F.** synchronous mode**Answer: D,E****Explanation:**A session may operate in one of two modes: asynchronous mode and demand mode. In asynchronous mode, both endpoints periodically send Hello packets to each other. If a number of those packets are not received, the session is considered down. In demand mode, no Hello packets are exchanged after the session is established; it is assumed that the endpoints have another way to verify connectivity to each other, perhaps on the underlying physical layer. However, either host may still send Hello packets if needed.
