AWS Configツールを使用して、さまざまなユーザーのアクセス許可を管理します**Answer: A**

Explanation:ExplanationThe AWS Documentation mentions the followingYou control access to Amazon API Gateway with IAM permissions by controlling access to the following two API Gateway component processes:\* To create, deploy, and manage an API in API Gateway, you must grant the API developer permissions to perform the required actions supported by the API management component of API Gateway.\* To call a deployed API or to refresh the API caching, you must grant the API caller permissions to perform required IAM actions supported by the API execution component of API Gateway.Option A, C and D are invalid because these cannot be used to control access to AWS services. This needs to be done via policies. For more information on permissions with the API gateway, please visit the following URL: <https://docs.aws.amazon.com/apigateway/latest/developerguide/permissions.html> The correct answer is: Use IAM Policies to create different policies for the different types of users.
