NEW QUESTION: 1A customer wants to provide advanced Layer 4 through Layer 7 security services for a VMware NSX microsegmentation deployment.Which platform would you recommend using in this scenario?**A.** vMX Series**B.** ACX Series**C.** vSRX Series**D.** QFX Series
Answer: C

NEW QUESTION: 2**A.** Option **A****B.** Option **D****C.** Option **B****D.** Option **C****Answer: A****Explanation:** Rate-based attack prevention identifies abnormal traffic patterns and attempts to minimize the impact of that traffic on legitimate requests. Rate-based attacks usually have one of the following characteristics:+ any traffic containing excessive incomplete connections to hosts on the network, indicating a SYN flood attack+ any traffic containing excessive complete connections to hosts on the network, indicating a TCP/IP connection flood attack+ excessive rule matches in traffic going to a particular destination IP address or addresses or coming from a particular source IP address or addresses.+ excessive matches for a particular rule across all traffic.Preventing SYN AttacksThe SYN attack prevention option helps you protect your network hosts against SYN floods. You can protect individual hosts or whole networks based on the number of packets seen over a period of time.If your device is deployed passively, you can generate events. If your device is placed inline, you can also drop the malicious packets. After the timeout period elapses, if the rate condition has stopped, the event generation and packet dropping stops.Source:

NEW QUESTION: 3A laptop with server 2012 R2 OS, you need to ensure that server 2012 R2 can use wireless network adapter.What should you do first?**A.** use server manager to install the Wireless Network Role**B.** use server manager to install the Wireless Network Feature**C.** use server manager to install the Wireless Lan Service Feature**D.** use server manager to install the Wireless Lan Service Role**Answer: C**

NEW QUESTION: 4A client is admitted to the psychiatric unit after lavage and stabilization in the emergency room for an overdose of antidepressants. This is her third attempt in 2 years. The highest priority intervention at this time is to:**A.** Observe for sedation and hypotension**B.** Assess level of consciousness**C.** Orient to her room and unit rules**D.** Assess suicide potential
Answer: D**Explanation:**Explanation(A) The client was stabilized in the ED and consequently would not be sent to the psychiatric unit if comatose.(B) Suicide assessment is always appropriate for clients with a history of previous attempts or depression, because either of these factors places the client at high risk. (C) The admission assessment should include

observation for sedation and hypotension, but this is not in priority over suicide assessment.
(D) Orientation to room and unit rules is of low priority at this time.
