NEW QUESTION: 3 Which two statements about IPS signatures are true? (Choose two.) **A.** All of the built-in signatures are enabled by default. **B.** It is recommended not to retire a signature that is not being used because then it cannot be restored. **C.** It is possible to define custom signatures. **D.** Once the signature is removed from the sensing engine it cannot be restored. **E.** Tuned signatures are built-in signatures whose parameters are adjusted. **Answer: C,E** Explanation: If you want to create a custom signature that is similar to an existing signature, you can create a clone, or copy, of the signature. You can then edit the parameters to make the clone perform according to your requirements. For example, you might want to create a clone of a Cisco-defined signature to customize it to your needs. You might find this preferable to

converting the Cisco signature to a Local or shared policy signature and directly editing its parameters. Reference:
