NEW QUESTION: 3 Which of the following is a benefit of Power Enterprise Pools? **A.** Provides greater flexibility to manage core and memory availability for workloads. **B.** Has no restrictions on where or how long cores and memory can be relocated. **C.** Provides automatic load balancing based on built in policies enabled in PowerVM. **D.** Can use a Scale-out system temporarily in certain conditions. **Answer: A** Explanation: Explanation/Reference: Power Enterprise Pools (PEP) provides the ability to move processor and memory resources from one server to another any time, with no physical movement of hardware, using easy operator commands in HMC. The PEP topology is a set of servers that is entitled to share a set of hardware processor and memory licenses between them. This grouping and sharing allows for fast workload balancing and LPM (Logical Partition Mobility) activity while keeping overall server capital costs lower. One does not have to purchase licenses for all resources on all systems, but instead can purchase fewer licenses overall and move them when needed, to and from servers as their workload requirements rise and fall.
