**NEW QUESTION: 2**A customer is having issues streaming video over wireless in a few high-density areas of their campus.After further investigation, the administrator has singled out the issue pertains to the clients associated to 802.11b/g only access points. The rest of the campus is covered in 802.11n access points. What is a possible reason for the issue with video streaming on the 802.11b/g access points as opposed to the802.11n access points?**A.** Due to the High-Density environment, there was high-utilization of the wireless spectrum. With 802.11n. the access points are able to aggregate the MSDU and MPDU frames into A-MSDU and A- MPDU frames, utilizing less airtime to transfer data**B.** The clients could not transmit data at the highest mandatory rate of 54 Mbps due to limitations with802.11b/g. This data-rate is only possible when transmitting at 802.11n speeds.**C.** The wireless clients were all transmitting at 802.11b data rates and would have operated properly had they been transmitting and receiving at 802.11g rates.**D.** The wireless controller was denying the client access to the video due to multicast-direct supporting the PHY rate of 48000 that the 802.11b/g client could not handle.

**Answer: A**

**NEW QUESTION: 3**SSH (Secure Shell)를 사용하여 네트워크의 서버에 액세스 할 때의 주요 이점은 다음과 같습니다.**A.** 더 나은 세션 안정성 제공**B.** man-in-the-middle 공격 방지**C.** 전송 된 데이터의 기밀성을 제공합니다.**D.** 플랫폼 간 커뮤니케이션을 용이하게 합니다.**Answer: C**
