Before the clients decide to buy our AD0-E126 test guide they can firstly be familiar with our products, When you are going to buy AD0-E126 exams dumps, you can consult us for any question at any time.

If you choose Estruturit's products, you will be well prepared for Adobe certification AD0-E126 exam and then successfully pass the exam, Both our soft test engine and app test engine have the exam scene simulation functions.

The answer is no.

NEW QUESTION: 1 Refer to the exhibit. Which statements are true about the subswitch ID that is filled in the header? (Choose three.) **A.** FabricPath switches running vPC+ use this field to identify the specific vPC+ PortChannel on which traffic is to be forwarded. **B.** In the absence of vPC+, this field is set to 0. **C.** The subswitch ID field is locally significant to each vPC+ switch pair. **D.** FabricPath switches running vPC use this field to identify the specific virtual switch. **E.** The subswitch ID field must be unique within the FabricPath domain. **Answer: A,B,C**

NEW QUESTION: 2 Refer to the exhibit. A network engineer needs a solution that allows employees at the remote office to access the Internet and other local resources, such as printers and storage. Employees should be able to access these resources even if the VPN connectivity between HQ and the Remote Office fails. As per the requirement, RAP should broadcast two SSIDs, CORP and LOCAL. The LOCAL SSID should not be visible to the employees as long as the VPN connectivity between Corporate HQ and the Remote Office is up. What is the recommended solution to meet the requirements? What is the recommended solution to meet the requirements? **A.** RAP Operation mode of the LOCAL SSID should be Safcup mode. **B.** RAP Operation mode of the LOCAL SSID should be Always mode. **C.** RAP Operation mode of the CORP SSID should be Bactup mode. **D.** RAP Operation mode of the CORP SSID should be Always mode. **Answer: A**

NEW QUESTION: 3 A media company has a 30-TB repository of digital news videos. These videos are stored on tape in an on-premises tape library and referenced by a Media Asset Management (MAM) system. The company wants to enrich the metadata for these videos in an automated fashion and put them into a searchable catalog by using a MAM feature. The company must be able to search based on information in the video, such as objects, scenery items, or people's faces. A catalog is available that contains faces of people who have appeared in the videos that include an image of each person. The company would like to migrate these videos to AWS. The company has a high-speed AWS Direct Connect connection with AWS and would like to move the MAM solution video content directly from its current file system. How can these requirements be met by using the LEAST amount of ongoing management overhead and causing MINIMAL disruption to the existing system? **A.** Set up an AWS Storage Gateway, tape gateway appliance on-premises. Use the MAM solution to extract the videos from the current archive and push them into the tape gateway. Use the catalog of faces to build a collection in Amazon Rekognition. Build an AWS Lambda function that invokes the Rekognition Javascript SDK to have Amazon Rekognition process the video in the tape gateway, retrieve the required metadata, and push the metadata into the MAM solution. **B.** Configure a video ingestion stream by using Amazon Kinesis Video Streams. Use the catalog of faces to build a collection in Amazon Rekognition. Stream the videos from the MAM solution into Kinesis Video

Streams. Configure Amazon Rekognition to process the streamed videos. Then, use a stream consumer to retrieve the required metadata, and push the metadata into the MAM solution. Configure the stream to store the videos in Amazon S3.**C.** Set up an Amazon EC2 instance that runs the OpenCV libraries. Copy the videos, images, and face catalog from the on-premises library into an Amazon EBS volume mounted on this EC2 instance. Process the videos to retrieve the required metadata, and push the metadata into the MAM solution while also copying the video files to an Amazon S3 bucket.**D.** Set up an AWS Storage Gateway, file gateway appliance on-premises. Use the MAM solution to extract the videos from the current archive and push them into the file gateway. Use the catalog of faces to build a collection in Amazon Rekognition. Build an AWS Lambda function that invokes the Rekognition Javascript SDK to have Rekognition pull the video from the Amazon S3 files backing the file gateway, retrieve the required metadata, and push the metadata into the MAM solution.**Answer: B** Explanation: <https://docs.aws.amazon.com/rekognition/latest/dg/streaming-video.html>

NEW QUESTION: 4 You host an application on an Azure virtual machine (VM) that uses a data disk. The application performs several input and output operations per second. You need to disable disk caching for the data disk. Which two actions will achieve the goal? Each answer presents a complete solution.**A.** Run the following Windows PowerShell cmdlet: Set-AzureDataDisk**B.** Use the Service Management REST API.**C.** Use the Azure Resource Manager REST API.**D.** Run the following Windows PowerShell cmdlet: Remove-AzureDataDisk
Answer: A, C Explanation: <http://msdn.microsoft.com/en-us/library/azure/jj157190.aspx>
