Getting a FCSS—Advanced Analytics 6.7 Architect exam certification will help you a lot.

**NEW QUESTION: 1**An internal auditor is reviewing the accounts receivable when she discovers account balances more than three years old. The auditor was previously supervising the area during this time, and she subsequently advises the chief audit executive (CAE) of a potential conflict. Which of the following is the most appropriate course of action for the CAE to take?  
**A.** Work with the division's management to resolve the situation.  
**B.** Withdraw the audit team and outsource the financial audit of the division.  
**C.** Continue with the present auditor, as more than one year has passed.  
**D.** Replace the auditor with another audit staff member.  
**Answer: D**

**NEW QUESTION: 2**A company is creating a new system based on Common Data Service. You need to select the features that meet the company's requirements. Which options should you use? To answer, drag the appropriate options to the correct requirements. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.  
**Answer:** Explanation:  
ExplanationBox 1: self-referential relationshipBox 2: connectionThere are other less formal kinds of relationships between records that are called connections. For example, it may be useful to know if two contacts are married, or perhaps they are friends outside of work, or perhaps a contact used to work for another account. Most businesses won't generate reports using this kind of information or require that it is entered, so it's probably not worthwhile to create entity relationships.Box 3: one-to-many relationshipBox 4: many-to-many relationship

**NEW QUESTION: 3**Which principles are used to architect applications for reliability on the AWS Cloud? (Choose two.)  
**A.** Backup recovery to an on-premises environment  
**B.** Use multiple Availability Zones  
**C.** Manage changes via documented processes  
**D.** Design for automated failure recovery  
**E.** Test for moderate demand to ensure reliability  
**Answer: C,D**

**NEW QUESTION: 4**Which of the following BEST describes the differences between VLAN hopping and session hijacking?  
**A.** VLAN hopping is the act of exploiting poor VLAN tagging. Session hijacking is a web-based attack aimed at privilege escalation.  
**B.** VLAN hopping is a brute force attack executed to gain additional access. Session hijacking involves physically disrupting a network connection.  
**C.** VLAN hopping involves overriding a user network connection to execute malicious commands. Session hijacking involves compromising a host to elevate privileges.  
**D.** VLAN hopping involves the unauthorized transition from one VLAN to another to gain additional access. Session hijacking involves overriding a user's web connection to execute commands.  
**Answer: D**
