Feel free to ask your queries to them, Once we have developed the newest version of the C\_ARSUM\_2404 actual exam material, our system will automatically send you the installation package of the study guide to your email boxes.

**NEW QUESTION: 1** Which of the following ensures that a TCB is designed, developed, and maintained with formally controlled standards that enforces protection at each stage in the system's life cycle?  
**A.** Covert storage assurance  
**B.** Life cycle assurance  
**C.** Operational assurance  
**D.** Covert timing assurance  
**Answer: B**  
**Explanation:** Explanation/Reference: Explanation: The Orange Book defines two types of assurance - operational assurance and life cycle assurance. Life cycle assurance ensures that a TCB is designed, developed, and maintained with formally controlled standards that enforces protection at each stage in the system's life cycle. Configuration management, which carefully monitors and protects all changes to a system's resources, is a type of life cycle assurance. The life cycle assurance requirements specified in the Orange Book are as follows: Security testing Design specification and testing Configuration management Trusted distribution  
**Incorrect Answers:** B: Operational assurance focuses on the basic features and architecture of a system. An example of an operational assurance would be a feature that separates a security-sensitive code from a user code in a system's memory. Operational assurance is not what is described in the question. C: Covert timing assurance is not one of the two defined types of assurance. D: Covert storage assurance is not one of the two defined types of assurance.
