NEW QUESTION: 4 You need to recommend a solution for the Public Key Infrastructure (PKI) that meets the following requirements: . Ensure that administrator in India can approve certificates for users in the India domain. . Minimize costs. What should you recommend? **A.**

Deploy an enterprise subordinate CA to the domain in India. **B.** Configure CA permissions and Certificate Manager Restrictions. **C.** Configure CA permissions and the ExitModule of the CA. **D.**

Deploy a standalone subordinate CA to the domain in India. **Answer: B** Explanation: CA & Restrictions. Permissions for Certificate Templates

<http://technet.microsoft.com/en-us/library/cc962068.aspx> A certificate manager can approve certificate enrollment and revocation requests, issue certificates, and manage certificates. This role can be configured by assigning a user or group the Issue and Manage

Certificate permission. When you assign this permission to a user or group, you can further refine their ability to manage certificates by group and by certificate template. For example, you might want to implement a restriction that they can only approve requests or revoke smart card logon certificates for users in a certain office or organizational unit that is the basis for a security group. This restriction is based on a subset of the certificate templates enabled for the certification authority (CA) and the user groups that have Enroll permissions for that certificate

template from that CA.
