Every page is full of well-turned words for your reference related wholly with the 3V0-32.23 training prep, After practicing, it's ok for you to take the VCAP-CMA Design exam.

VMware certification has proved its important effect in many aspects of your life, (3V0-32.23 Exam preparation files) In fact, many factors contribute to the **3V0-32.23 Sample Questions Answers** unfavorable situation, like furious competition, higher requirements and so on.

NEW QUESTION: 1What is the retention period for remotely attached endpoints?**A.** 5 minutes **B.** 15 minutes **C.** 10 minutes **D.** 3 minutes **Answer: A**

NEW QUESTION: 2Which of the following are cloud computing roles?**A.** CSP and backup service provider **B.** Cloud customer and financial auditor **C.** Cloud service broker and user **D.** Cloud service auditor and object **Answer: A**
Explanation:Explanation/Reference:Explanation:The following groups form the key roles and functions associated with cloud computing. They do not constitute an exhaustive list but highlight the main roles and functions within cloud computing:- Cloud customer: An individual or entity that utilizes or subscribes to cloud based services or resources.- CSP: A company that provides cloud-based platform, infrastructure, application, or storage services to other organizations or individuals, usually for a fee; otherwise known to clients "as a service.- Cloud backup service provider: A third-party entity that manages and holds operational responsibilities for cloud-based data backup services and solutions to customers from a central data center.- CSB: Typically a third-party entity or company that looks to extend or enhance value to multiple customers of cloud-based services through relationships with multiple CSPs. It acts as a liaison between cloud services customers and CSPs, selecting the best provider for each customer and monitoring the services. The CSB can be utilized as a "middleman" to broker the best deal and customize services to the customer's requirements. May also resell cloud services.- Cloud service auditor: Third-party organization that verifies attainment of SLAs.

NEW QUESTION: 3You work as a CSO (Chief Security Officer) for Tech Perfect Inc. You want to perform the following tasks: Develop a risk-driven enterprise information security architecture. Deliver security infrastructure solutions that support critical business initiatives. Which of the following methods will you use to accomplish these tasks?**A.** Service-oriented architecture **B.** Service-oriented modeling and architecture **C.** Service-oriented modeling framework **D.** Sherwood Applied Business Security Architecture **Answer: D**
Explanation:SABSA (Sherwood

Applied Business Security Architecture) is a framework and methodology for Enterprise Security Architecture and Service Management. SABSA is a model and a methodology for developing risk-driven enterprise information security architectures and for delivering security infrastructure solutions that support critical business initiatives. The primary characteristic of the SABSA model is that everything must be derived from an analysis of the business requirements for security, especially those in which security has an enabling function through which new business opportunities can be developed and exploited. Answer B is incorrect. The service-oriented modeling framework (SOMF) is a service-oriented development life cycle methodology. It offers a number of modeling practices and disciplines that contribute to a successful service-oriented life cycle management and modeling. The service-oriented modeling framework illustrates the major elements that identify the "what to do" aspects of a service development scheme. Answer A is incorrect. The service-oriented modeling and architecture (SOMA) includes an analysis and design method that extends traditional object-oriented and component-based analysis and design methods to include concerns relevant to and supporting SOA. Answer D is incorrect. The service-oriented architecture (SOA) is a flexible set of design principles used during the phases of systems development and integration.
