NEW QUESTION: 1LenoxSoft has purchased a list of prospects and wants to send emails to those prospects in Pardot immediately. What is the correct way to handle this?**A.** Run a permissions pass on the purchased lists to get permission quickly before sending them a marketing email.**B.** Recommend that it is okay to send to purchased lists in Pardot.**C.** Recommend that they must receive explicit permission from those prospects on the purchased list before they can upload that prospect list into Pardot.**D.** Have LenoxSoft split their purchased list into multiple sends so as to not affect the IP's reputation.**Answer: C**

NEW QUESTION: 2Which two of the following correctly describe the protocols used in wireless security? (Choose two)**A.** Both WPA and WPA2 support the CCMP protocol**B.** WPA only supports TKIP as the data encryption algorithm**C.** WPA2 requires mandatory use of AES algorithms for encryption**D.** WEP (Wired Equivalent Privacy) uses RC4 stream cipher to provide data confidentiality**E.** Temporal Key Integrity Protocol (TKIP) uses 128-bit static keys**Answer: C,D**

NEW QUESTION: 3Your company has an internal Web site that requires HTTPS. The Web site's certificate is self-signed.You have a computer that runs Windows 7 and Windows Internet Explorer 8.You use HTTPS to browse to the Web site and receive the following warning message.There is a problem with this website's security certificate.You need to prevent the warning message from appearing when you access the Web site.What should you do?**A.** From Certificate Manager, import the Web sites certificate into your Trusted Root Certification Authorities store.**B.** From Certificate Manager, import the Web sites certificate into your Personal store.**C.** From Internet Explorer, add the Web site to the Trusted sites zone.**D.** From Internet Explorer, enable InPrivate Browsing.**Answer: A****Explanation:**Certificate ManagerA certificate manager can approve certificate enrollment and revocation requests, issue certificates, and manage certificates. This role can be configured by assigning a user or group the Issue and Manage Certificates permission.When you assign this permission to a user or group, you can further refine their ability to manage certificates by group and by certificate template. For example, you might want to implement a restriction that they can only approve requests or revoke smart card logon certificates for users in a certain office or organizational unit that is the basis for a security group.
