Updated Palo Alto Networks Certified Network Security Engineer Exam study material, We can accept **PCNSE Test Topics Pdf** and arrange a full refund requests only if your score report or any relevant filed be confirmed, The best reason for choosing Estruturit PCNSE exam questions dumps is its reliability and authenticity.

**NEW QUESTION: 1**You have a server named Served that runs Windows Server 2012 R2. You connect three new hard disks to Server 1.You need to create a storage space that contains the three disks.The solution must meet the following requirements:- Provide fault tolerance if a single disk fails.- Maximize the amount of useable storage space. What should you create?**A.** A mirrored space**B.** A parity space**C.** A spanned volume**D.** A simple space**Answer: B**Explanation: Simple space does not provide fault tolerance, neither does spanned volumes, whereas parity & mirrored spaces do. So the question is parity space or mirrored space to maximize the amount of useable storage space? [http://en.wikipedia.org/wiki/Spanned\\_volume](http://en.wikipedia.org/wiki/Spanned_volume) Unlike RAID, spanned volumes have no fault- tolerance, so if any disk fails, the data on the whole volume could be lost.

<http://arstechnica.com/informationtechnology/2012/10/storage-spaces-explained-a-greatfeaturewhen-itworks/> Storage Spaces explained: a great feature, when it works Three-way mirroring gives you less usable space than two-way mirroring, but can tolerate the failure of up to two disks at once.Parity mirroring gives more usable space than either mirroring mode (a 20GB storage space configured with two-way mirroring will require about 40GB of physical disk space, but a 20GB parity storage space requires only about 30GB) but comes with the aforementioned performance hit. <http://technet.microsoft.com/en-us/library/jj822938.aspx>

**NEW QUESTION: 2**An application wants to utilize side effects of cascading entity manager operations to related entities.Which statement is correct?**A.** The persist operation is always cascaded to related entitles for one-to one and one-to-many relationships.**B.** The persist operation applied to a new entity x is cascaded to entities referenced by x if the relationship from x to these other entities is annotated with the cascade=PERSIST or cascade=ALL

annotation element value.**C.** The remove operation applied to a removed entity x is cascaded to entities referenced by x of the relationship from x to these other entities is annotated with the cascade = REMOVE of cascade = ALL annotation element value.**D.** To minimize the effect of the remove operation applied to an entity participating in a many-to-many relationship the remove operation should he cascade to entities on both sides of the relationship.**Answer: B**  
Explanation:Explanation/Reference:The semantics of the flush operation, applied to an entity X are as follows:\* If X is a managed entity, it is synchronized to the database./For all entities Y referenced by a relationship from X, if the relationship to Y has been annotated with the cascade element value cascade=PERSIST or cascade=ALL, the persist operation is applied to Y.  
Reference:  
<http://stackoverflow.com/questions/4748426/cannot-remove-entity-which-is-target-of-one-to-one-relation> (answer 1)

**NEW QUESTION: 3**A female client has been recently diagnosed as bipolar. She has taken lithium for the past several weeks to control mania. What must be included in client education regarding lithium toxicity?**A.** Take lithium between meals to increase absorption.**B.** Withhold lithium if experiencing diarrhea, vomiting, or diaphoresis.**C.** For pain or fever, avoid aspirin or acetaminophen (Tylenol). Nonsteroidal anti-inflammatory drugs are preferred.**D.** Maintain a normal diet; however, limit salt intake to no more than 3 g/day.**Answer: B**  
Explanation:(A) The client should maintain a normal diet including normal salt intake. A low-sodium diet can cause lithium retention, leading to toxicity. (B) Lithium must be taken with meals because it is irritating to the gastric mucosa. (C) Diarrhea, vomiting, or diaphoresis can cause dehydration, which will increase lithium blood levels. If these symptoms occur, the nurse should instruct the client to withhold lithium. (D) Lithium is not to be taken with over-the-counter drugs without specific instruction. Some drugs raise lithium levels, whereas others lower lithium levels.

**NEW QUESTION: 4**When preparing a public machine image for the provisioning of new cloud computing instances, which of the following steps should be done? (Choose TWO correct answers.)**A.** Remove all configuration files from /etc/ that were not manually modified.**B.** Remove all remote login services (i.e. SSH) from the image.**C.** Remove all private SSH keys from the image.**D.** Remove all default users and groups, including root and nobody.**E.** Remove all confidential data from the image.**Answer: C,E**
