Answer: A,B,D

NEW QUESTION: 3 The FIRST step in data classification is to:
A. establish ownership **B.** perform a criticality analysis **C.** define access rules **D.** create a data dictionary
Answer: A
Explanation: Data classification is necessary to define access rules based on a need-to-do and need-to-know basis. The data owner is responsible for defining the access rules; therefore, establishing ownership is the first step in data classification. The other choices are incorrect. A criticality analysis is required for protection of data, which takes input from data classification. Access definition is complete after data classification and input for a data dictionary is prepared from the data classification process.
