Furthermore, we use international recognition third party for your payment for MCIA-Level-1 exam dumps, and your money and account safety can be guaranteed.

NEW QUESTION: 1Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in the series.
Start of repeated scenario
Contoso. Ltd. has a Microsoft SQL Server environment that includes SQL Server Integration Services (SSIS), a data warehouse, and SQL Server Analysis Services (SSAS) Tabular and multidimensional models. The data warehouse stores data related to your company sales, financial transactions and financial budgets. All data for the data warehouse originates from the company's business financial system. The data warehouse includes the following tables: The company plans to use Microsoft Azure to store older records from the data warehouse. You must modify the database to enable the Stretch Database capability. Users report that they are becoming confused about which city table to use for various queries. You plan to create a new schema named Dimension and change the name of the dbo.du_city table to Dimension.city. Data loss is not permissible, and you must not leave traces of the old table in the data warehouse. Pal to create a measure that calculates the profit margin based on the existing measures. You must implement a partitioning scheme few the fact. Transaction table to move older data to less expensive storage. Each partition will store data for a single calendar year, as shown in the exhibit (Click the Exhibit button.) You must align the partitions. You must improve performance for queries against the fact.Transaction table. You must implement appropriate indexes and enable the Stretch Database capability.
End of repeated scenario
You need to resolve the problems reported about the dia__city table. How should you complete the Transact-SQL statement? To answer, drag the appropriate Transact-SQL segments to the correct locations. Each Transact-SQL segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
Answer: Explanation:

NEW QUESTION: 2The following variable was found in a user's notes.ini file:
ENABLE_EARLY_AUTHENTICATION=0
Which of the following will not function properly?
A. The ability to log into the integrated Sametime client
B. Roaming user
C. The ability to recover user ID files from the server ID vault
D. Authentication after the Notes workbench appears
Answer: B

NEW QUESTION: 3ある企業が、Azure App Serviceモバイルアプリをバックエンドとして使用して、フィールドサービス担当者向けのモバイル

アプリを開発しています。

会社のネットワーク接続は一日を通して変化します。アプリがオンラインアプリの場合、ソリューションはオフラインでの使用をサポートし、バックグラウンドで変更を同期する必要があります。解決策を実装する必要があります。

どのようにしてコードセグメントを完成させるべきですか？回答するには、回答領域で適切なオプションを選択します。注：それぞれ正しい選択は1ポイントの価値があります。**Answer:**

Explanation:ExplanationBox 1: var todoTable = client GetSyncTable<TodoItem>()To setup offline access, when connecting to your mobile service, use the method GetSyncTable instead of GetTable (example):IMobileServiceSyncTable todoTable =

App.MobileService.GetSyncTable(); / Box 2: await

todoTable.PullAsync("allTodoItems",todo.Table.CreateQuery()); Your app should now use IMobileServiceSyncTable (instead of IMobileServiceTable) for CRUD operations.This will save changes to the local database and also keep a log of the changes. When the app is ready to synchronize its changes with the Mobile Service, use the methods PushAsync and PullAsync (example):await App.MobileService.SyncContext.PushAsync();await todoTable.PullAsync();
