You must dream to get the H14-331_V1.0 certificate.

NEW QUESTION: 1An organization wants to deploy cloud applications using block storage. The architect has included a hyperscale storage solution in the cloud design.Which requirements led to including this solution in the design?**A.** Organization does not want to purchase a storage array **B.** Organization wants to use a full mesh topology to combine storage and application processing **C.** Organization wants to purchase a storage array Organization will use a spine/leaf topology to combine storage and application processing **D.** Organization wants to keep storage processing separate from the application processing **Answer: B****Explanation:**When customers want converged/hyper-converged infrastructure appliances (or rack scale systems) - what customers ask for is this: They want a management and orchestration stack that spans the domains of compute/storage/virtualization (in appliances), and this extends to the top-of-rack network and spine/leaf network (in rack-scale systems that must scale to and beyond rack boundaries operationally). Note: Hyperscale storage is the storage of vast quantities of information in media capable of increasing in size rapidly, efficiently, and indefinitely. In a data center, hyperscale storage capacity commonly runs into the petabytes. References:http://virtualgeek.typepad.com/virtual_geek/page/4/
