NEW QUESTION: 1Contracts are currently managed by more than 20 contract owners across the organization, each happily managing in their own way. A business analyst (BA) is tasked to elicit requirements for centrally managing software maintenance and license contracts.Which of the following does the BA need to carry out first?**A.** Identify future state conditions**B.** Identify business requirements**C.** Complete an enterprise readiness assessment**D.** Recommend an off the shelf product**Answer: A**

NEW QUESTION: 2A. Option B**B.** Option C**C.** Option F**D.** Option A**E.** Option E**F.** Option D
Answer: A,E,F

NEW QUESTION: 3HOTSPOTYour network contains an Active Directory forest. The forest contains two domains named Domain1 and Domain2.Domain1 contains a file server named Server1. Server1 has a shared folder named Share1.Domain2 contains 50 users who require access to Share1.You need to create groups in each domain to meet the following requirements:In Domain1, create a group named Group1. Group1 must be granted access to Share1.In Domain2, create a group named Group2. Group2 must contain the user accounts of the 50 users.Permission to Share1 must only be assigned directly to Group1.Which type of groups should you create and which group nesting strategy should you use?To answer, select the appropriate configuration in the answer area.**Hot Area:Answer:** Explanation: Explanation/Reference:Explanation:Any group, whether it is a security group or a distribution group, is characterized by a scope that identifies the extent to which the group is applied in the domain tree or forest. The boundary, or reach, of a group scope is also determined by the domain functional level setting of the domain in which it resides. There are three group scopes: universal, global, and domain local.Security groups in a nesting strategy with global scope can have only accounts as their members. And Security groups with domain local scope can have other groups with global scope and accounts as their members.

NEW QUESTION: 4A technician has just updated a user's PC to Windows 7 and connected to a network printer through a print server. After finishing, the user reports that the printer will not print. Which of the following is the MOST likely reason for this issue?**A.** The print server does not have the proper driver.**B.** The PC's network connection is down.**C.** The printer is not installed on the print server.**D.** The server is using PCL instead of PostScript.**Answer: A**
