Here I would like to tell you how to effectively prepare for Microsoft AZ-801 exam and pass the test first time to get the certificate, About the materials that relate to Microsoft AZ-801 exam, many websites can offer the exam materials.

NEW QUESTION: 1 A logistics manager is developing a supply chain risk management plan incorporating contingency plans for alternatives to transportation failures. Which of the following factors best represents this approach?**A. Mitigation****B. Redundancy****C. Avoidance****D. Acceptance****Answer: C**

NEW QUESTION: 2 The implementation group has been using the test bed to do an IPv6 'proof-of-concept'. After several changes to the network addressing and routing schemes, a trouble ticket has been opened indicating that the loopback address on R1 (2026::111:1) is not able to ping the loopback address on DSW2 (2026::102:1). Use the supported commands to isolate the cause of this fault and answer the following question. On which device is the fault condition located?**A. R4****B. R1****C. DSW1****D. DSW2****E. ASW1****F. R2****G. ASW2****H. R3****Answer: H**
Explanation: Start to troubleshoot this by pinging the loopback IPv6 address of DSW2 (2026::102:1). This can be pinged from DSW1, and R4, but not R3 or any other devices past that point. If we look at the routing table of R3, we see that there is no OSPF neighbor to R4: This is due to mismatched tunnel modes between R3 and R4: Problem is with R3, and to resolve the issue we should delete the "tunnel mode ipv6" under interface Tunnel 34.

NEW QUESTION: 3 In January, a bank buys a basket of mortgages with a view to securitize them by April. Due to an unexpected lack of investors in the securitization market, it is unable to do so and is left with the exposure to the mortgages on its books. This is an example of:**A. Basis risk****B. Pipeline and warehousing risk****C. Wrong-way risk****D. Market risk****Answer: B**
Explanation: This is an example of pipeline and warehousing risk. Generally there is a lag between acquiring assets and securitizing them due to the legal work to be done, the

work to be done by the ratings agencies and in finding investors. During this period, the bank is exposed to the underlying assets purchased, and this is the 'pipeline and warehousing' risk as these assets are in the pipeline and warehoused for intended subsequent sale. Generally this period tends to be short. However, during the credit crisis this became a significant source of risk as many banks were left exposed to risk they had intended to get rid of, but could not do so as the market dried up. The other choices are all incorrect. Note that pipeline and warehousing risk is also known as 'securitization risk'. It means that funding from securitization cannot be relied upon as a matter of fact.

NEW QUESTION: 4 For an Outgoing cross currency funds transfer, what is the amount tag for the debit and credit transaction entries of the transfer? (Choose the best answer.)
A. Amt_Equiv for both the legs
B. Trf_Amt for both the legs
C. Trf_Amt and Amt_Equiv, respectively
D. Amt_Equiv and Trf_Amt, respectively
Answer: B
