## HIGHLY RATED PRODUCTS.

**NEW QUESTION: 1** DRAG DROP An organization plans to deploy Microsoft Project Server 2013. You need to install and configure Project Server in an existing SharePoint farm. Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.) **Answer:** Explanation: Box 1: Install the Project Server 2013 binaries on the existing SharePoint servers. Box 2: Run the SharePoint 2013 Products Configuration Wizard. Box 3: Start the Project Server service instance and create a Project Server service application. Box 4: Create a Project web app instance. Note: \* (step 1) If you already installed and configured SharePoint Server 2013 and you would like to try out Project Server 2013 features there's no need to install another SharePoint server. You can simply integrate between Project Server 2013 and SharePoint Server 2013 using an existing site collection. Project Server 2013 runs as a service application under SharePoint Server 2013. In order to integrate between those products, Project Server 2013 must be installed on each application server in your SharePoint farm. Reference: Add an application server to a farm in Project Server 2013 \* (step 2) First thing that has to be done after installing Project Server 2013 is to run the SharePoint Products Configuration Wizard. The wizard has to run on all application servers in your farm before you can start using Project Server. \* (step 3) Start the Project Server Application Service. Create a Project Server service application. Open SharePoint 2013 Central Administration -> Application Management -> Manage service applications -> New -> Project Server Service Application. Specify a name for the service application and choose an application pool. \* (step 4) Create a Project Web App database. Open the SharePoint 2013 Management Shell and use the following PowerShell cmdlet: New-SPPProjectDatabase -Name DatabaseName -ServiceApplication "ServiceApplicationName" -DatabaseServer SQLServerInstance -Tag String. For example: New-SPPProjectDatabase -Name ProjectWebApp1 -ServiceApplication "ProjectServiceApp" -DatabaseServer sp2013srv -Tag "ProjectWebApp1DB" Reference: How to integrate Project Server 2013 with SharePoint Server 2013

**NEW QUESTION: 2** Which of the following is correct for the command to view the number of security policy matches? **A.** display security-policy all **B.** count security-policy hit **C.** display security-policy count **D.** display firewall sesstiontable **Answer: A**
