The questions are from the real API-570 exam test papers, so that people who buy our product can obtain as much as mock exam experience before they set foot in the examination room.

In order to not fall behind the new tendency, you must work hard and strive for higher skills level, Boost Your Confidence by using API-570 Practice Exam Questions.

Regularly updated Most trusted, Many exam candidates ascribe their success to our API-570 Latest Real Test Questions real questions and become our regular customers eventually.

NEW QUESTION: 1 Which two attributes were introduced with the Cisco IOS BGP 4-byte ASN feature? (Choose two.)
A. AS4_AGGREGATOR **B.** AS4_PATH **C.** AS4_PLAIN **D.** AS4_TRANSE.
AS4_DOT **Answer: A,B**

NEW QUESTION: 2 This QFD matrix was used in the design process for a ball point pen. What symbol is appropriate for the square labeled 2? **Answer:**

NEW QUESTION: 3 An entity uses the following formula in determining its optimal level of cash. This formula is a modification of the economic order quantity EOQ formula used for inventory management. Assume that the set of selling marketable securities is US \$10 per transaction and the interest rate on marketable securities is 6% per year. The entity estimates that it will make cash payments of US \$12,000 over a one-month period. What is the average cash balance rounded to the nearest dollar)?
A. US \$6,928 **B.** US \$1,000 **C.** US \$2,000 **D.** US \$3,464 **Answer: D**
Explanation: The BOO for inventory is a function of ordering cost per order, inventory demand, and carrying cost. In the cash model, the fixed cost per sale of securities is equivalent to the ordering cost, the demand for cash is similar to the demand for inventory, and the interest rate is effectively the cost of carrying a dollar of cash for the period. Substituting in the formula yields an optimal cash balance of about US \$6,928. Thus, the average cash balance is US \$3,464 (\$6,928 - 2).
