**E.** 不要なサービスを無効にします  
**Answer: E**

**NEW QUESTION: 3** Cache mirroring technology means that data is written to a controller, at the same time, to which module will the data be written?  
**A.** the server Cache  
**B.** to end controller mirroring Cache  
**C.** data safe  
**D.** the hard disk cache  
**Answer: B**

**NEW QUESTION: 4** A university is running an internal web application on AWS that students can access from the university network to check their exam results. The web application runs on Amazon EC2 instances and pulls results from an Amazon DynamoDB table. Auto Scaling is currently configured to add a new web server when CPU is greater than 80% for 5 minutes. DynamoDB is configured to increase both read and write capacity units by five when utilization is greater than 80%. Exam results are released at 9:00 a.m. each Monday, and 80% of students attempt to access their unique result within the first 30 minutes. Despite Auto Scaling being enabled, students are complaining of slow response times and errors when they view the site. There are no performance complaints after 9:30 a.m. on Monday. Which recommendation should a Solutions Architect make to improve performance in a cost-effective manner?  
**A.** Use Amazon CloudFront to cache web request and reduce the load on EC2 and DynamoDB.  
**B.** Implement Amazon DynamoDB Accelerator to improve database performance and remove the need to scale the read/write units.  
**C.** Scale out the EC2 instances to ensure that the environment scales up and down based on the highest load.  
**D.** Use a scheduled job to scale out EC2 before 9:00 a.m. on Monday and to scale down after 9:30 a.m.  
**Answer: D**
