Answer: B Explanation: Instead you should customize the default synchronization rule. Note: To delete a custom domain name, you must first ensure that no resources in your directory rely on the domain name. You can't delete a domain name from your directory if: * Any user has a user name, email address, or proxy address that includes the domain name. * Any group has an email address or proxy address that includes the domain name. * Any application in your Azure AD has an app ID URI that includes the domain name.
