NEW QUESTION: 1You have a web server that hosts several web applications.From Microsoft Visual Studio, you create an assembly that is signed.You need to make the assembly available to all of the web applications on the web server. The solution must minimize the number of copies of the assembly.Which tool should you run?**A.** regasm.exe**B.** sn.exe**C.** tlbImp.exe**D.** gacutil.exe**Answer: B****Explanation:**Explanation/Reference:Explanation:Strong Name Scenario The following scenario outlines the process of signing an assembly with a strong name and later referencing it by that name.Assembly A is created with a strong name using one of the following methods:Using a development environment that supports creating strong names, such as Visual Studio 2005.Creating a cryptographic key pair using the Strong Name tool (Sn.exe) and assigning that key pair to the assembly using either a command-line compiler or the Assembly Linker (Al.exe). The Windows Software Development Kit (SDK) provides both Sn.exe and Al.exe.References:
<https://docs.microsoft.com/en-us/dotnet/framework/app-domains/create-and-use-strong-named-assemblies>

NEW QUESTION: 2A user attempting to log on to a workstation for the first time is prompted for the following information before being granted access: username, password, and a four-digit security pin that was mailed to him during account registration. This is an example of which of the following?**A.** Multifactor authentication**B.** Single factor authentication**C.** Biometric authentication**D.** Dual-factor authentication**Answer: B****Explanation:**Multi-factor authentication (MFA) is a method of computer access control which a user can pass by successfully presenting authentication factors from at least two of the three categories: knowledge factors ("things only the user knows"), such as passwords possession factors ("things only the user has"), such as ATM cards inherence factors ("things only the user is"), such as biometricsIn this question a username, password, and a four-digit security pin knowledge are all knowledge factors (something the user knows). Therefore, this is single-factor authentication.

NEW QUESTION: 3As a consultant, you've been hired by XYZ Company to provide recommendations about client device selection, operation, and interoperability. What information should be considered to help them choose the right WLAN client devices?**A.** 802.11ac is not backwardly compatible with 802.11n or 802.11a.**B.** In order to earn Wi-Fi Alliance certification, 802.11n clients stations are required to support both 2.4 and 5 GHz frequencies**C.** 802.11n OFDM is more susceptible to high-power, narrowband interference than 802.11a OFDM**D.** 802.11ac devices support the features of the VHT PHY only in the 5 GHz frequency band.**Answer: D**
