NEW QUESTION: 1You currently have an application with an Auto Scaling group with an Elastic Load Balancer configured in AWS. After deployment users are complaining of slow response time for your application. Which of the following can be used as a start to diagnose the issue?
A. Use Cloudwatch to monitor the ELB latency
B. Use Cloudwatch to monitor the HealthyHostCount metric
C. Use Cloudwatch to monitor the Memory Utilization
D. Use Cloudwatch to monitor the CPU Utilization
Answer: A
Explanation: Explanation High latency on the ELB side can be caused by several factors, such as:
* Network connectivity* ELB configuration* Backend web application server issues
For more information on ELB latency, please refer to the below link:
<https://aws.amazon.com/premiumsupport/knowledge-center/elb-latency-troubleshooting/>

NEW QUESTION: 2

情報セキュリティリスクの評価と管理にビジネス管理を関与させることの主な利点は、次のことです。
A. 組織のリスクをよりよく理解します。
B. セキュリティ管理よりも客観的です。
C. セキュリティアーキテクチャをよりよく理解します。
D. 技術的リスクとビジネスリスクのバランスを取ることができます。
Answer: A

NEW QUESTION: 3Which of the following must a user implement if they want to send a secret message to a coworker by embedding it within an image?
A. Hashing
B. Steganography
C.

Transport encryption
D. Digital signature
Answer: B
Explanation: Steganography is the process of concealing a file, message, image, or video within another file, message, image, or video. Note: The advantage of steganography over cryptography alone is that the intended secret message does not attract attention to itself as an object of scrutiny. Plainly visible encrypted messages, no matter how unbreakable will arouse interest, and may in themselves be incriminating in countries where encryption is illegal. Thus, whereas cryptography is the practice of protecting the contents of a message alone, steganography is concerned with concealing the fact that a secret message is being sent, as well as concealing the contents of the message.
Incorrect Answers:
A. Transport encryption encrypt the payload data
C. A hash function is used to map digital data of variable size to digital data of fixed length.
D. A digital signature is similar in function to a standard signature on a document. It validates the integrity of the message and the sender.
