If any changes will be made in HPE2-W09 exam material, it will be offered to valued customers free.

NEW QUESTION: 1 DRAG DROP You are the desktop administrator for a company. All client desktops have office 365 ProPlus installed. You need to implement telemetry for the Office 365 ProPlus clients. You have a Microsoft SQL Server 2014 deployment that will be used for the telemetry database. Which three actions must you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** Explanation: References: <https://technet.microsoft.com/en-us/library/jj219431.aspx>

NEW QUESTION: 2 When a job exceeds the date specified in its END_DATE attribute, which of the following will happen? (Choose all that apply.) **A.** The STATE attribute of the job will be set to COMPLETED if the value of the AUTO_DROP attribute is FALSE. **B.** The STATE column of the job table will be set to COMPLETED for the job. **C.** The job will be dropped automatically if the value of the AUTO_DROP attribute is TRUE. **D.** The job will only be disabled if the value of the AUTO_DROP attribute is FALSE. **E.** All objects referenced by the job will be dropped if the value of the AUTO_DROP attribute is TRUE and the value of the CASCADE attribute is TRUE. **Answer: A, C, D** Explanation: Explanation/Reference: Explanation: auto_drop, If TRUE (the default), indicates that the job should be dropped once completed. end_date, This attribute specifies the date and time after which the job expires and is no longer run. After the end_date, if auto_drop is TRUE, the job is dropped. If auto_drop is FALSE, the job is disabled and the STATE of the job is set to COMPLETED. If no value for end_date is specified, the job repeats forever unless max_runs or max_failures is set, in which case the job stops when either value is reached. The value for end_date must be after the value for start_date. If it is not, an error is generated when the job is enabled.

NEW QUESTION: 3 Your customer has asked you to come in and verify the operation of routers R1 and R2 which are configured to use HSRP. They have questions about how these two devices will perform in the event of a device failure. What issue is causing Router R1 and R2 to both be displayed as the HSRP active router for group 2? **A.** The HSRP Hello packets are blocked **B.** The HSRP timers mismatch **C.** The HSRP group number mismatch **D.** The HSRP group authentication is misconfigured **E.** The HSRP group priorities are different **Answer: D** Explanation:

Explanation/Reference:Explanation:Based on the configuration output, we see that authentication is configured on R2, but not on R1:This can be further verified by issuing the "show standby" command on each router.
