NEW QUESTION: 1When we talk about portfolios, programs and projects, it is inevitable to mention the business value which is the sum of tangible and intangible assets of an organization, also known as the net quantifiable benefit. When it comes to business value, at which level of the organization is the Business Value achieved?**A. Program****B. Project****C. Operational****D. Portfolio****Answer: C**
Explanation:ExplanationPortfolios optimize the pursuit of BV by choosing which initiatives to undergo and by prioritizing them to meet goals and objectives. This is why greater BV is generated through portfolios Programs improve the generation of BV by realizing benefits aligned with strategic objectives and by linking different projects together to realize greater benefits Projects optimize the delivery of BV by producing outputs for a program objective; after all, the deliverable is generated at the project level where the project manager will optimize the delivery in terms of cost, time, scope and quality.BV is then acquired at the level of operations and normally expressed in monetary terms. BV is achieved at operational level because take an example of designing a software application that will help your sales unit have faster "order processing time" thus gaining more contracts which will be reflected in a 5% revenue increase each year. BV starts to be acquired when the sales unit starts using the software application and not a minute before (and this is at operations level)
