The Best formula to get a marvelous success in SAP Certified Associate C_ARSCC_2404 Exam.

NEW QUESTION: 1You are designing a Windows Azure application. Messages will be placed into a Windows Azure Queue and then processed by a worker role. There is no requirement for adherence to the Windows Azure Service Level Agreement (SLA).You need to recommend an approach for concurrently processing messages while minimizing compute cost.What should you recommend?**A.** Multiple role instances that process messages individually**B.** A single role instance that processes messages individually**C.** A single role instance with multithreaded request processing**D.** Multiple role instances, each with multithreaded request processing

Answer: CExplanation:ExplanationThreads: When the request for the background work comes in, the web role starts as many threads as necessary (or queues the individual work items to the thread pool). In this option, we would configure a larger instance during the heavy workload, because these threads could require a lot of memory.Incorrect:Not C, not D: SLA would require multiple role instances.References:
