### Reliable H19-338 Sample Exam bring you the best H19-338 New Exam Simulator for Huawei HCPP-Storage

If you buy our products, you can also continue your study when you are in an offline **H19-338 Sample Exam** state, Nothing irrelevant and confusing content has been included to save the

candidates from botheration of taking any extra material or coaching.

Enhance Your Tech Skills By Passing Huawei H19-338 Certification Exam, Our H19-338 exam questions are compiled by experts and approved by the professionals with years of experiences.

Why choose our website, It is impossible for everyone to **H19-338 Sample Exam** concentrate on one thing for a long time, because as time goes by, people's attention will gradually decrease.

For example, you will enjoy free renewal for one year, which means that you can enjoy the best H19-338 actual test material, If you do not have access to internet most of the time, if you need to go somewhere is in an offline state but you want to learn for your H19-338 exam.

It only takes 20 hours for you to complete the training course and then easily pass your first time to attend Huawei certification H19-338 exam.

**NEW QUESTION: 1**다운 타임 가능성이 가장 낮은 재해 복구 시나리오는 무엇입니까?**A.** 백업 및 복원**B.** 표시 등**C.** 워밍업 대기**D.** 다중 사이트 활성화-활성**Answer: D****Explanation:**Backup and Restore: a simple, straightforward, cost-effective method that backs up and restores data as needed. Keep in mind that because none of your data is on standby, this method, while cheap, can be quite time-consuming.Pilot Light: This method keeps critical applications and data at the ready so that it can be quickly retrieved if needed.Warm Standby: This method keeps a duplicate version of your business' core elements running on standby at all times, which makes for a little downtime and an almost seamless transition.Multi-Site Solution: Also known as a Hot Standby, this method fully replicates your company's data/applications between two or more active locations and splits your traffic/usage between them. If a disaster strikes, everything is simply rerouted to the unaffected area, which means you'll suffer almost zero downtime. However, by running two separate environments simultaneously, you will obviously incur much higher costs.

**NEW QUESTION: 2**You have a server named Server1 that runs Windows Server 2012 R2.You create a custom Data Collector Set (DCS) named DCS1.You need to configure Server1 to start DCS1 automatically when the network usage exceeds 70 percent.Which type of data collector should you create?**A.** A configuration data collector**B.** A performance counter alert**C.** An event trace data collector**D.** A performance counter data collector**Answer: B****Explanation:** Explanation/Reference:Explanation:Performance alerts notify you when a specified performance counter exceeds your configured threshold by logging an event to the event log. But rather than notifying you immediately when the counter exceeds the threshold, you can configure a time period over which the counter needs to exceed the threshold, to avoid unnecessary alerts.

**NEW QUESTION: 3**John works as a Network Administrator for We-are-secure Inc. The We-are-secure server is based on Windows Server 2003. One day, while analyzing the network security, he receives an error message that Kernel32.exe is encountering a problem. Which of the following steps should John take as a countermeasure to this situation?**A.** He should observe the process viewer (Task Manager) to see whether any new process is running on the computer or not. If any new malicious process is running, he should kill that process.**B.** Explanation:In such a situation, when John receives an error message revealing that Kernel32.exe is encountering a problem, he needs to come to the conclusion that his antivirus program needs to be updated, because Kernel32.exe is not a Microsoft file (It is a Kernel32.DLL file.). Although such viruses normally run on stealth mode, he should examine the process viewer (Task Manager) to see whether any new process is running on the computer or not. If

any new process (malicious) is running on the server, he should exterminate that process.**C.** He should restore his Windows settings.**D.** He should download the latest patches for Windows Server 2003 from the Microsoft site, so that he can repair the kernel.**E.** He should upgrade his antivirus program.**Answer: A,B,E**Explanation:B are incorrect. Since kernel.exe is not a real kernel file of Windows, there is no need to repair or download any patch for Windows Server 2003 from the Microsoft site to repair the kernel. Note: Such error messages can be received if the computer is infected with malware, such as Worm\_Badtrans.b, Backdoor.G\_Door, Glacier Backdoor, Win32.Badtrans.29020, etc.
