NEW QUESTION: 1 Which feature must be configured to allow packet capture over Layer 3 infrastructure? **A.** RSPAN **B.** VSPAN **C.** IPSPAN **D.** ERSPAN **Answer: D** **Explanation:** Encapsulated remote SPAN (ERSPAN): encapsulated Remote SPAN (ERSPAN), as the name says, brings generic routing encapsulation (GRE) for all captured traffic and allows it to be extended across Layer 3 domains.

NEW QUESTION: 2 From the answers below, select the advantages of using Infrastructure as Code. (select four) **A.** Provide a codified workflow to develop customer-facing applications **B.** Safely test modifications using a "dry run" before applying any actual changes **C.** Provide reusable modules for easy sharing and collaboration **D.** Easily integrate with application workflows (GitLab Actions, Azure DevOps, CI/CD tools) **E.** Easily change and update existing infrastructure **Answer: B,C,D,E** **Explanation:** Infrastructure as Code is not used to develop applications, but it can be used to help deploy or provision those applications to a public cloud provider or on-premises infrastructure. All of the others are benefits to using Infrastructure as Code over the traditional way of managing infrastructure, regardless if it's public cloud or on-premises.

NEW QUESTION: 3 What is the goal of Unicast Reverse Path Forwarding? **A.** to verify the reachability of the destination address in multicast packets **B.** to verify the reachability of the destination address in forwarded packets **C.** to verify the reachability of the source address in forwarded packets **D.** to help control network congestion **Answer: C** **Explanation:** Network administrators can use Unicast Reverse Path Forwarding (Unicast RPF) to help limit the malicious traffic on an enterprise network. This security feature works by enabling a router to verify the reachability of the source address in packets being forwarded. This capability can limit the appearance of spoofed addresses on a network. If the source IP address is not valid, the packet is discarded. **Reference:** <http://www.cisco.com/web/about/security/intelligence/unicast-rpf.html>
