Which highly available Virtual I/O server network solution should be used to meet this requirement? **A.** Network Interface Backup **B.** Shared Ethernet Adapter Failover **C.** VLAN tagging **D.** Link Aggregation **Answer: B**

NEW QUESTION: 3 You want to control network traffic among your DBaaS instances. Which two statements are true about network groups? **A.** You can create a network group to enable unrestricted communication among your DBaaS instances. **B.** You can add a DBaaS instance to a network group, thus enabling communication with all other DBaaS instances both inside and outside the network group. **C.** You can add a DBaaS instance to a network group, but this enables communication only within this network group. **D.** DBaaS prevents network groups from having unrestricted communication among DBaaS instances. **E.** By default, the DBaaS instances in a network group are accessible from hosts outside the network group. **Answer: C, D** Explanation: Explanation/Reference: Network groups provide a method for VMs to be grouped together for communications and firewall rules. You can define network groups to allow VMs within a group to communicate with each other, while also preventing those VMs from communicating outside the group. Note: Access rule. Access rules define the permitted paths of communication for VMs that are within a network group. You can define an access rule to

enable a specific path of communication between two network groups, or between a network group and a specified list of IP addresses.References:
