NEW QUESTION: 1 Which of the following four iterative steps are conducted on third-party vendors in an on-going basis?
A. Investigate, Evaluate, Respond, Monitor
B. Frame, Assess, Respond, Monitor
C. Frame, Assess, Remediate, Monitor
D. Investigate, Assess, Remediate, Monitor
Answer: C

NEW QUESTION: 2 You need to meet the technical requirements for the finance department site collection. What should you do?
A. From the Security&Compliance admin center, create a classification label policy
B. From the Security&Compliance admin center, create a permission policy
C. From the SharePoint admin center, select the finance department site collection, and then configure the Share settings
D. From the SharePoint admin center, select Sharing, and then select Limit external sharing using domains
Answer: D
Explanation: Explanation Scenario: Restrict users from sharing content from the finance department site collection to the Litware users* To restrict domains in external sharing in SharePoint Online and OneDrive for Business at the organization level* Sign in to <https://admin.microsoft.com> as a global or SharePoint admin.* In the left pane, under Admin centers, select SharePoint. (You might need to select Show all to see the list of admin centers.) If this opens the new SharePoint admin center, select Classic SharePoint admin center in the left pane.* In the left pane, select sharing.* Under Additional settings, select the Limit external sharing using domains check box.* From the drop-down list, choose either Don't allow sharing with users from these blocked domains to deny access to targeted domains or Allow sharing only with users from these domains to limit access to only to the domains you list.* List the domains (maximum of 1000) in the box provided, using the format domain.com.
References:

<https://docs.microsoft.com/en-us/sharepoint/restricted-domains-sharing> Topic 1, Contoso Case Study Overview Existing Environment Active Directory Environment The network contains an on-premises Active Directory domain. All users are created in the domain and are organized units (OUs) the users use their domain credentials to sign in to their computer. Microsoft Office 365 Environment Contoso has a Microsoft Office 365 subscription and uses the following

services: * OneDrive for Business * SharePoint Online * Exchange Online * Yammer * Teams
Currently, the identity of each user is maintained separately in both on-premises Active Directory and Office365. Contoso implements SharePoint site collections for the following departments: * Research & development * Human resources (HR) * Marketing * Finance * IT Each department assigns a site owner to manage its site collection and to manage access. The site collection of each department contains multiple subsites. Sharing is allowed across different site collections by default. External sharing is enabled for the organization. Current Business Model Contoso has the following business model: * The HR department has a branded site collection * Currently, the default storage limit is set for all the site collections * The marketing department uses multiple site collections created by an administrator named Admin1 * Contoso has a strategic partnership with a company name Litware, Inc. Litware has an Office 365 subscription. All users at Litware have a user account in the litware.com domain
Problem Statements Contoso identifies the following uses: * Non-site owners invite external users to access the content in SharePoint Online * Users upload audio, video, and executable program files to OneDrive for Business * The company manages two separate identifies for each user, which creates more administrative work * Users in the HR department report performance issues affecting their site collection. You suspect that the issues are due to large images on the home page
Technical Requirements Contoso has the following technical requirements for the Office 365 environment: * Add a Yammer feed to new communication sites * Prevent non-site owners from inviting external users * Troubleshoot the performance issues of the HR department site collection * Increase a 100-GB storage limit for the site collection of the marketing department * Prevent users from syncing media files, such as MP3 and MP4 files, from OneDrive * Restrict users from sharing content from the finance department site collection to the Litware users * Ensure that SharePoint administrators do not have administrative permissions to the site collections * Ensure that the managers in the marketing department can view the storage metrics of the marketing department sites * Maintain all user identities in on-premises Active Directory, Sync passwords to Microsoft Azure Active Directory (Azure AD) * Ensure that when users are deleted from Microsoft 365, their associated OneDrive content is retained for 90 days. After 90 days, the content must be deleted permanently

NEW QUESTION: 3 You write the following code segment to create a new account record by using the Representational State Transfer (REST) endpoint. Line numbers are included for reference only. Which code segment should you include at line 04 to create the URL to the Open Data Protocol (OData) endpoint?
A. `var ODataPath = Xrm.Page.context.getClientUrl() + "/XRMServices/2011/OrganizationData.svc";`
B. `var ODataPath = Xrm.Page.context.getClientUrl() + H/XRMServices/2e1l/Discovery.svc";`
C. `var ODataPath * Xrm.Page.context.getClientUrl() + M/XRMServices/2007/Organization.5vcM;`
D. `var ODataPath = Xrm.Page.context.getClientUrl() + M/XRMServices/2011/Organization.svc";`
Answer: A

NEW QUESTION: 4 You have an Azure Active Directory (Azure AD) tenant. All administrators must enter a verification code to access the Azure portal. You need to ensure that the administrators can access the Azure portal only from your on-premises network. What should you configure?
A. an Azure AD Identity Protection sign-in risk policy
B. an Azure AD Identity Protection user risk policy
C. the multi-factor authentication service settings
D. the default for all the roles in Azure AD Privileged Identity Management
Answer: C
