Adobe AD0-E330 certification exam is a high demand exam tests in IT field because it proves your ability and professional technology.

NEW QUESTION: 1An Organization uses Exchange Online. You enable mailbox audit logging for all mailboxes. User1 reports that her mailbox has been accessed by someone else. You need to determine whether someone other than the mailbox owner has accessed the mailbox. What should you do?
A. Run the following Windows PowerShell command:

New-AdminAuditLogSearch-Identity User1-LogonTypes Admin, Delegate, External-ShowDetails

B. Run the following Windows PowerShell command: Search-MailboxAuditLog-Identity User1-LogonTypes Admin, Delegate, External-ShowDetails
C. In the Exchange Admin Center, navigate to the In-place eDiscovery & Hold section of the Protection page. Run a non-owner mailbox access report.
D. In the Exchange Admin Center, navigate to the In-place eDiscovery & Hold section of the Compliance Management page. Run a non-owner mailbox access report.

Answer: D
Explanation: Explanation The Non-Owner Mailbox Access Report in the Exchange Administration Center (EAC) lists the mailboxes that have been accessed by someone other than the person who owns the mailbox. Run a non-owner mailbox access report
Note: When a mailbox is accessed by a non-owner, Microsoft Exchange logs information about this action in a mailbox audit log that's stored as an email message in a hidden folder in the mailbox being audited. Entries from this log are displayed as search results and include a list of mailboxes accessed by a non-owner, who accessed the mailbox and when, the actions performed by the non-owner, and whether the action was successful.
* In the EAC, navigate to Compliance Management > Auditing.
* Click Run a non-owner mailbox access report.
* By default, Microsoft Exchange runs the report for non-owner access to any mailboxes in the organization over the past two weeks. The mailboxes listed in the search results have been enabled for mailbox audit logging.
* To view non-owner access for a specific mailbox, select the mailbox from the list of mailboxes. View the search results in the details pane

NEW QUESTION: 2You are managing a site collection in a SharePoint farm. You need to configure the minimum level of permissions necessary for users to manage lists in the site collection. What permission level should you configure?
A. Create
B. Limited Access
C. View Only
D. Edit
Answer: D

NEW QUESTION: 3Your network contains an Active Directory domain. The domain contains two Hyper-V hosts. You plan to perform live migrations between the hosts. You need to ensure that

the live migration traffic is authenticated by using Kerberos. What should you do first? **A.** From Server Manager, install the Host Guardian Service server role on a domain controller. **B.** From Active Directory Users and Computers, modify the Delegation properties of the computer accounts for both servers. **C.** From Server Manager, install the Host Guardian Service server role on both servers. **D.** From Active Directory Users and Computers, add the computer accounts for both servers to the Cryptographic Operators group. **Answer: B** Explanation: Explanation/Reference: Explanation: If you have decided to use Kerberos to authenticate live migration traffic, configure constrained delegation before you proceed to the rest of the steps.
