**Answer: D**

**NEW QUESTION: 4** **A.** Option D  
**B.** Option C  
**C.** Option B  
**D.** Option A  
**Answer: D**  
Explanation:  
The AWS Documentation mentions the optional Mappings section matches a key to a corresponding set of named values. For example, if you want to set values based on a region, you can create a mapping that uses the region name as a key and contains the values you want to specify for each specific region. You use the Fn::FindInMap intrinsic function to retrieve values in a map. For more information on mappings please refer to the below link:  
<http://docs.aws.amazon.com/AWSCloudFormation/latest/UserGuide/mappings-section-structure.html>
