Many of them remain allusive particularly to those who do not [Study C-C4H51-2405 Reference](#) have a comprehensive knowledge and the hands-on practice of the relevant fields, You just need to receive the version.

What's more, we pay emphasis on the comprehensive service to every customer, The interface of PEGACPCSD24V1 exam practice software is user-friendly so you will not face any difficulty to become familiar with it.

After all, we have set a good example for our high **Valid PEGACPCSD24V1 Exam Prep** quality, We employ forward-looking ways and measures, identify advanced ideas and systems, and develop state-of-the-art technologies and processes that help build one of the world's leading Pegasystems Certification PEGACPCSD24V1 updated prep exam.

NEW QUESTION: 1 展示を参照してください。

図のように、負荷分散のためにルータR1とR2をVRRPで設定しました。

この構成のどの2つの効果は真実であるか？（2つを選択してください） **A.**

PC2とPC4はルータR1をプライマリゲートウェイとして使用します。 **B.**

4つのPCはすべての要求をルータR1に送信し、必要に応じてトラフィックをルータR2に転送します。

C. 4台のPCは、ルータR1とR2の間でパケットをラウンドロビンします。 **D.**

ルータR1は10.1.0.1のプライマリゲートウェイであり、ルータR2は10.1.0.10のプライマリゲートウェイです。 **E.**

ルータR2は10.1.0.1のプライマリゲートウェイで、ルータR1は10.1.0.10のプライマリゲートウェイです。 **F.** PC1とPC3はルータR1をプライマリゲートウェイとして使用します。 **Answer: D,F**

NEW QUESTION: 2

情報システム監査人は、ほとんどのユーザーが物理的なアクセス制御に準拠していないことを観察しました。ビジネスマネージャーは、コントロールの設計は非効率的であると説明しています。審査員の最善の行動方針は何ですか？ **A.**

アクセス制御プロセスを変更して効率を上げることをお勧めします。 **B.**

統制の失敗による影響を特定し、その結果をリスクレーティングで報告します。 **C.**

物理的なアクセス制御を再設計および再テストします。 **D.**

経営陣と協力して、より優れたコントロールを設計および実装します。 **Answer: B**

NEW QUESTION: 3 You are creating a CU script that creates an Azure web app and related services in Azure App Service. The web app uses the following variables: You need to automatically deploy code from GitHub to the newly created web app. How should you complete the script? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Topic 2, Litware Inc Overview This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections

on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the `Use the buttons in the left pane to explore the content of the case study before you answer the questions.` Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question. Overview Background You are a developer for Litware Inc., a SaaS company that provides a solution for managing employee expenses. The solution consists of an ASP.NET Core Web API project that is deployed as an Azure Web App. Overall architecture Employees upload receipts for the system to process. When processing is complete, the employee receives a summary report email that details the processing results. Employees then use a web application to manage their receipts and perform any additional tasks needed for reimbursement Receipt processing Employees may upload receipts in two ways: * Uploading using an Azure Files mounted folder * Uploading using the web application Data Storage Receipt and employee information is stored in an Azure SQL database. Documentation Employees are provided with a getting started document when they first use the solution. The documentation includes details on supported operating systems for Azure File upload, and instructions on how to configure the mounted folder. Solution details Users table Web Application You enable MSI for the Web App and configure the Web App to use the security principal name, Processing Processing is performed by an Azure Function that uses version 2 of the Azure Function runtime. Once processing is completed, results are stored in Azure Blob. Storage and an Azure SQL database. Then, an email summary is sent to the user with a link to the processing report. The link to the report must remain valid if the email is forwarded to another user. Requirements Receipt processing Concurrent processing of a receipt must be prevented. Logging Azure Application Insights is used for telemetry and logging in both the processor and the web application. The processor also has Trace Writer logging enabled. Application Insights must always contain all log messages. Disaster recovery Regional outage must not impact application availability. All DR operations must not be dependent on application running and must ensure that data in the DR region is up to date. Security Users' SecurityPin must be stored in such a way that access to the database does not allow the viewing of SecurityPins. The web application is the only system that should have access to SecurityPins. All certificates and secrets used to secure data must be stored in Azure Key Vault. You must adhere to the Least Privilege Principal. All access to Azure Storage and Azure SQL database must use the application's Managed Service Identity (MSI). Receipt data must always be encrypted at rest. All data must be protected in transit, User's expense account number must be visible only to logged in users. All other views of the expense account number should include only the last segment, with the remaining parts obscured. In the case of a security breach, access to all summary reports must be revoked without impacting other parts of the system. Issues Upload format issue Employees occasionally report an issue with uploading a receipt using the web application. They report that when they upload a receipt using the Azure File Share, the receipt does not appear in their profile. When this occurs, they delete the file in the file share and use the web application, which returns a 500 Internal Server error page. Capacity issue During busy periods, employees report long delays between the time they upload the receipt and when it appears in the web application. Log capacity issue Developers report that the number of log messages in the trace output for the processor is too high, resulting in lost log messages- Application code Processing.cs Database.cs ReceiptUploader.cs ConfigureSSE.ps1
