From the A00-255 actual lab questions you will find the difference between us and the others.

NEW QUESTION: 1A company has an Active Directory Domain Services (AD DS) domain. The company has 300 retail stores with a domain controller in each store. All domain controllers run Windows Server 2003. The domain controllers host an application that remote users access by using Terminal Services. You are planning to replace the domain controllers. The retail stores do not have secure locations in which to store network equipment and servers. You have the following requirements: -Make the application available as a RemoteApp. -Ensure that non-administrative users can access the application. -Maximize domain security. You need to deploy domain controllers that meet the requirements. What should you recommend? (More than one answer choice may achieve the goal. Select the BEST answer.) **A.** Deploy Windows Server 2008 R2 as a read-only domain controller (RODC). **B.** Deploy Windows Server 2008 R2 as a domain controller. **C.** Deploy a Server Core installation of Windows Server 2008 R2 as a read-only domain controller (RODC). **D.** Deploy a Server Core installation of Windows Server 2008 R2 as a domain controller. **Answer: A**
