Next, through my introduction, I hope you can have a deeper understanding of our NSK100 learning quiz.

NEW QUESTION: 1You are implementing a website redesign of an existing website that provides historical weather condition maps. The current layout resembles the graphic in the exhibit. (Click the Exhibit button.) Year selection is implemented as a set of links, which causes the page to reload when the user changes the year. The year selection HTML is contained in a div with an id of "year-selector". You need to modify the page so that the user can change the year without the page reloading. You also need to ensure that there is minimal change to the design of the page. Which code segment should you use? **A. Option B B. Option C C. Option A D. Option D**
Answer: D
Explanation: Explanation/Reference: Explanation: HTML5 slider contains min and max properties: min Minimum value of the range. Default minimum value is 0. max Maximum value of the range. Default maximum value is 100. Incorrect: Not A: HTML5 slider contains "range" property, but it used for enabling and configuring range selection in slider, not for setting min and max possible values. NEW QUESTION: 2Your customer uses LDAP for centralized user/group management. How will you integrate permissions management for the customer's Big Data Appliance into the existing architecture? **A. Enable Oracle Identity Management for Big Data and point its keystore to the LDAP directory for user lookup. B. Make Kerberos the single source of truth and have LDAP use the Key Distribution Center for user lookup. C. Make Oracle Identity Management for Big Data the single source of truth and point LDAP to its keystore for user lookup. D. Enable Kerberos and have the Key Distribution Center use the LDAP directory for user lookup.**
Answer: D
Explanation: Explanation/Reference: Kerberos integrates with LDAP servers - allowing the principals and encryption keys to be stored in the common repository. The complication with Kerberos authentication is that your organization needs to have a Kerberos KDC (Key Distribution Center) server setup already, which will then link to your corporate LDAP or Active Directory service to check user credentials when they request a Kerberos ticket. NEW QUESTION: 3You are the administrator of a system that a large number of developers work on. These developers crash the system, and their applications, on a regular basis. What command would you use to configure where the core files are saved? **A. dumpadm B. savecore C. svcadm D. proc E. coreadm**
Answer: E
Explanation: Explanation/Reference: Explanation: The coreadm command is used to specify the name and location of core files produced by abnormally-terminating processes.

NEW QUESTION: 4In Unica Marketing Operations, how many templates can a customer have for digital assets? **A. Ten B. Five C. Three D. One**
Answer: D
