And we can claim that, as long as you focus on the 156-521 training engine, you will pass for sure, There are mainly four advantages of our all-round service that you can't miss our 156-521 free certification demo definitely.

NEW QUESTION: 1 An input of the Plan Procurement Management process is: **A.** Seller proposals. **B.** Procurement documents. **C.** Make-or-buy decisions. **D.** Activity cost estimates.
Answer: D

NEW QUESTION: 2 You are using Oracle Applications R11.5.10 for HR, Payroll, and Benefits, and a third party application for Talent Management. You are exploring the option of moving to Fusion HCM including Talent Management. What is the recommended road map? **A.** Move all the applications to Fusion including Talent Management. **B.** Upgrade HR, Payroll, and Benefits to R12. Adopt Fusion Talent Management and be coexistent with R12. Later, move other modules one by one or all at once. **C.** Move Payroll, Benefits, and Talent Management to Fusion. Adopt coexistence model with EBS 11.5.10. Later, move HR to Fusion. **D.** Move only Talent management to Fusion and coexist with EBS 11.5.10. Later, move all other application to Fusion. **Answer: B**

NEW QUESTION: 3 Given the business use case: 'New Trucks' runs a fleet of trucks in a rental business in the U.S. The majority of the trucks are owned; however, in some cases, 'New Trucks' may procure other trucks by renting them from third parties to their customers. When trucks are leased, the internal source code is 'L'. When trucks are owned, the internal source code is 'O'. This identifies different accounts used for the Journal entry. Customers sign a contract to initiate the truck rental for a specified duration period. The insurance fee is included in the contract and recognized over the rental period. For maintenance of the trucks, the 'New Trucks' company has a subsidiary company 'Fix Trucks' that maintains its own profit and loss entity. To track all revenue, discounts, and maintenance expenses, 'New Trucks' needs to be able to view: total maintenance fee, total outstanding receivables, rental payment discounts, and total accrued and recognized insurance fee income. 'New Trucks' and 'Fix Trucks' are located in the same country and share chart-of accounts and accounting conventions. How many ledgers are required to be set up? **A.** One primary, one secondary ledger **B.** Two primary ledgers **C.** One primary, one reporting currency ledger **D.** One primary ledger **Answer: D**

NEW QUESTION: 4Shipping Webサイトのエラーを解決する必要があります。Azure Table Storageサービスをどのように構成する必要がありますか？

答えるには、適切なオプションを選択します回答エリア。

注：それぞれの正しい選択には1ポイントの価値があります。**Answer:** Explanation:Explanation

Box 1: AllowedOriginsA CORS request will fail if Access-Control-Allow-Origin is missing.

Scenario:The following error message displays while you are testing the website:Box 2:

http://test-shippingapi.wideworldimporters.comSyntax: Access-Control-Allow-Origin: *

Access-Control-Allow-Origin: <origin>Access-Control-Allow-Origin: null<origin> Specifies an origin. Only a single origin can be specified.Box 3: AllowedOriginsBox 4: POSTThe only allowed methods are GET, HEAD, and POST. In this case POST is used."<Corsrule>" "allowedmethods" Failed to load no "Access-control-Origin" header is present References:

<https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Access-Control-Allow-Origin>

Topic 2, Coho WineryCase Study:OverviewThis is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case studyTo display the first question in this case study, click the Next button Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All

Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

LabelMaker appCoho Winery produces, bottles, and distributes a variety of wines globally. You are a developer implementing highly scalable and resilient applications to support online order processing by using Azure solutions. Coho Winery has a LabelMaker application that prints labels for wine bottles. The application sends data to several printers. The application consists of five modules that run independently on virtual machines (VMs).

Coho Winery plans to move the application to Azure and continue to support label creation. External partners send data to the LabelMaker application to include artwork and text for custom label designs.

RequirementsDataYou identify the following requirements for data management and manipulation:* Order data is stored as nonrelational JSON and must be queried using Structured Query Language (SQL).* Changes to the Order data must reflect immediately across all partitions. All reads to the Order data must fetch the most recent writes.

SecurityYou have the following security requirements:* Users of Coho Winery applications must be able to provide access to documents, resources, and applications to external partners.* External partners must use their own credentials and authenticate with their organization's identity management solution.* External partner logins must be audited monthly for application use by a user account administrator to maintain company compliance.* Storage of e-commerce application settings must be maintained in Azure Key Vault.* E-commerce application sign-ins must be secured by using Azure App Service authentication and Azure Active Directory (AAD).* Conditional access policies must be applied at the application level to protect company content.* The LabelMaker application must be secured by using an AAD account that has full access to all namespaces of the Azure Kubernetes Service (AKS) cluster.

LabelMaker appAzure Monitor Container Health must be used to monitor the performance of workloads that are deployed to Kubernetes environments and hosted on Azure Kubernetes Service (AKS).You must use Azure Container Registry to publish images that support the AKS deployment.

ArchitectureIssuesCalls to the Printer API App fail periodically due to printer

communication timeouts. Printer communication timeouts occur after 10 seconds. The label printer must only receive up to 5 attempts within one minute. The order workflow fails to run upon initial deployment to Azure. Order.Json Relevant portions of the app files are shown below. Line numbers are included for reference only. The JSON file contains a representation of the data for an order that includes a single item.
