NEW QUESTION: 1 The following two passages deal with the political movements working for the woman's vote in America. Passage 1 The first organized assertion of woman's rights in the United States was made at the Seneca Falls convention in 1848. The convention, though, had little immediate impact because of the national issues that would soon embroil the country. The contentious debates involving slavery and state's rights that preceded the Civil War soon took center stage in national debates. Thus woman's rights issues would have to wait until the war and its antecedent problems had been addressed before they would be addressed. In 1869, two organizations were formed that would play important roles in securing the woman's right to vote. The first was the American Woman's Suffrage Association (AWSA). Leaving federal and constitutional issues aside, the AWSA focused their attention on state-level politics. They also restricted their ambitions to securing the woman's vote and downplayed discussion of women's full equality. Taking a different track, the National Woman's Suffrage Association (NWSA), led by Elizabeth Stanton and Susan B. Anthony, believed that the only way to assure the long-term security of the woman's vote was to ground it in the constitution. The NWSA challenged the exclusion of woman from the Fifteenth Amendment, the amendment that extended the vote to African-American men. Furthermore, the NWSA linked the fight for suffrage with other inequalities faced by woman, such as marriage laws, which greatly disadvantaged women. By the late 1880s the differences that separated the two organizations had receded in importance as the women's movement had become a substantial and broad-based political force in the country. In 1890, the two organizations joined forces under the title of the National American Woman's Suffrage Association (NAWSA). The NAWSA would go on to play a vital role in the further fight to achieve the woman's vote. Passage 2 In 1920, when Tennessee became the thirty-eighth state to approve the constitutional amendment securing the woman's right to vote, woman's suffrage became enshrined in the constitution. But woman's suffrage did not happen in one fell swoop. The success of the woman's suffrage movement was the story of a number of partial victories that led to the explicit endorsement of the woman's right to vote in the constitution. As early as the 1870s and 1880s, women had begun to win the right to vote in local affairs such as municipal elections, school board elections, or prohibition measures. These "partial suffrages" demonstrated that women could in fact responsibly and reasonably participate in a representative democracy (at least as voters). Once such successes were achieved and maintained over a period of time, restricting the full voting rights of woman became more and more suspect. If women were helping decide who was on the local school

board, why should they not also have a voice in deciding who was president of the country? Such questions became more difficult for non-suffragists to answer, and thus the logic of restricting the woman's vote began to crumble. The differences between the AWSA and the NWSA were ultimately resolved when **A.** the two organizations were combined to form the NAWSA. **B.** woman's suffragists won significant victories in the 1890 general election. **C.** the Civil War ended. **D.** prohibition passed. **E.** the Twenty-Second Amendment passed. **Answer: A**
Explanation: Don't be distracted by the wrong answers. Without even reading the passage, you could guess that the conflict between two organizations was resolved when they combined. The answer is (B).

NEW QUESTION: 2 A. Option B B. Option A C. Option D D. Option C **Answer: A**

NEW QUESTION: 3 A small company has a website that provides online customer support. The company requires an account recovery process so that customers who forget their passwords can regain access. Which of the following is the BEST approach to implement this process? **A.** Web-based form that identifies customer by another mechanism and then emails the customer their forgotten password. **B.** Replace passwords with hardware tokens which provide two-factor authentication to the online customer support site. **C.** Require the customer to physically come into the company's main office so that the customer can be authenticated prior to their password being reset. **D.** Web-based form that identifies customer by another mechanism, sets a temporary password and forces a password change upon first login. **Answer: D**
Explanation: Explanation/Reference: Explanation: People tend to forget their passwords, thus you should have a password recovery system for them that will not increase risk exposure. Setting a temporary password will restrict the time that the password is valid and thus decrease risk; and in addition forcing the customer to change it upon first login will make the password more secure for the customer.
