**NEW QUESTION: 2**If the issuer of the collateral used in a repo defaults during the term of the transaction, who suffers the loss? A. Seller B. It depends on the agreement between the buyer and seller C. Issuer D. Buyer **Answer: A**

**NEW QUESTION: 3**Anna, who has developed traditional Lotus Notes application for years, is working on her first XPage application. Until now, she always tried to achieve goals by using as much @formulas as possible. Now she is asking her colleagues about @formulas with XPages. Which of the following answers is wrong? A. Pete said that she can use @formulas, but because it is running inside JavaScript, @formulas are case sensitive, and instead of semicolons it uses commas to separate parameters. B. Thomas said that there is no @formula language with XPages. C. Adam told her that she can use @formulas, but some of them have different functionality. D. Marc explained that she can use most of the @formulas within JavaScript.

**Answer: B**

**NEW QUESTION: 4**Which two are benefits of partitioning in Oracle Spatial? A. faster index builds B. reduced CPU utilization C. reduced storage needs D. reduced network utilization E. query parallelism **Answer: A, E** Explanation: Explanation/Reference: Partitioning is used in data management solutions to address issues of manageability, scalability, and performance C: Here are some Oracle partitioning capabilities that can enhance scalability and performance: Search multiple table or index partitions in parallel Spread the I/O load associated with table or index accesses across multiple controllers Store data physically on disk so that data that is likely to be processed together is close together on disk Eliminate partitions from consideration based on a partition key D: There are many meaningful benefits of partitioning to enhance manageability in a DBMS solution. These benefits include the ability to: Backup data on a partition-by-partition basis Restore data on a partition-by-partition basis Load a partition at a time Store data in different tablespaces on a partition-by-partition basis Rebuild indexes on a partition-by-partition basis References:
