Some people wonder how they can improve **1z1-819 Latest Exam Labs** themselves and get promotion; they feel their career is into a bottleneck.

NEW QUESTION: 1In order to use network locations as part of your distributed model for the Content Server, there are two important requirements. The first is that proximity values must be defined for each network location. What is the second requirement?**A.** ensure that there is a replicated global registry on each of the network locations**B.** designate a repository as the global registry and the network location definition will be stored in that repository**C.** designate the network locations on the distributed Content Servers so that the user logs in to the nearest Content Server**D.** designate the network locations in the clientsdfc.properties file to ensure that they connect to the closest Content Server**Answer: B**

NEW QUESTION: 2Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Your network contains an Active Directory domain named contoso.com. The domain contains a DNS server named Server1. All client computers run Windows 10. On Server1, you have the following zone configuration. You need to ensure that all of the client computers in the domain perform DNSSEC validation for the fabrikam.com namespace. Solution: From a Group Policy object (GPO) in the domain, you modify the Network List Manager Policies. Does this meet the goal?**A.** Yes**B.** No**Answer: B**Explanation: Network List Manager Policies are security settings that you can use to configure different aspects of how networks are listed and displayed on one computer or on many computers. Network List Manager Policies are not related to DNSSEC.
