**NEW QUESTION: 1** Data centers have enormous power resources that are distributed and consumed throughout the entire facility. Which of the following standards pertains to the proper fire safety standards within that scope? **A.** IDC **B.** NFPA **C.** Uptime Institute **D.** BICSI  
**Answer: B**  
**Explanation:** The National Fire Protection Association (NFPA) publishes a broad range of fire safety and design standards for many different types of facilities. Building Industry Consulting Services International (BICSI) issues certifications for data center cabling. The Uptime Institute publishes the most widely known and used standard for data center topologies and tiers. The International Data Center Authority (IDCA) offers the Infinity Paradigm, which takes a macro-level approach to data center design.

**NEW QUESTION: 2** A company Chief Information Officer (CIO) is unsure which set of standards should govern the company's IT policy. The CIO has hired consultants to develop use cases to test against various government and industry security standards. The CIO is convinced that there is large overlap between the configuration checks and security controls governing each set of standards. Which of the following selections represent the BEST option for the CIO? **A.** Issue a RFQ for vendors to quote a complete vulnerability and risk management solution to the company. **B.** Issue a policy that requires only the most stringent security standards be implemented throughout the company. **C.** Issue a RFI for vendors to determine which set of security standards is best for the company. **D.** Issue a policy specifying best practice security standards and a baseline to be implemented across the company. **Answer: D**

**NEW QUESTION: 3** A company uses Microsoft Azure SQL Database to store sensitive company data. You encrypt the data and only allow access to specified users from specified locations. You must monitor data usage, and data copied from the system to prevent data leakage. You need

to configure Azure SQL Database to email a specific user when data leakage occurs. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** Explanation: Explanation

**NEW QUESTION: 4** You design a SQL Server 2008 Integration Services (SSIS) package. The package extracts data from flatfiles and loads this data to a SQL Server 2008 database. The package contains two Boolean variables named @IsWeekday and @IsHoliday. When the package is executed on week days, the @IsWeekday variable is set to True. When the package is executed on holidays, the @IsHoliday variable is set to True. You need to implement the following business logic in the control flow of the package: When the @IsWeekday variable is set to True, the Perform Weekday Processing Data Flow task is executed. When the @IsWeekday variable is set to False, the Perform Weekend Processing Data Flow task is executed. When the @IsHoliday variable is set to True, the Perform Holiday Processing Data Flow task is executed. Which control flow logic should you implement? **A. Option A B. Option B C. Option D D. Option C**

**Answer: A**
