NEW QUESTION: 1 You maintain an application that is used by local food delivery companies. When a customer requests a delivery, the application sends a message to all of the delivery companies. One company accepts the request and fulfills the order. The application currently supports orders of 100 products or fewer. Some of the delivery companies can now deliver large orders that contain up to 500 products. You must modify the application so that it supports both small orders and large orders. Messages about large orders should be sent to only delivery companies that can fulfill them. Messages about small orders should be sent to all delivery companies. Which service should you use? **A.** Azure Service Bus Namespace **B.** Azure Service Bus Queue **C.** Azure Service Bus Topics **D.** Azure Service Bus Relay **Answer: C**

NEW QUESTION: 2 Which of the following are the steps usually followed in the development of documents such as security policy, standards and procedures? **A.** initiation, evaluation, development, approval, publication, implementation, and maintenance. **B.** design, evaluation, approval, publication, and implementation. **C.** design, development, publication, coding, and testing. **D.** feasibility, development, approval, implementation, and integration. **Answer: A**
Explanation: The common steps used in the development of security policy are initiation of the project, evaluation, development, approval, publication, implementation, and maintenance. The other choices listed are the phases of the software development life cycle and not the step used to develop documents such as Policies, Standards, etc... Reference: TIPTON, Harold F. & KRAUSE, MICKI, Information Security Management Handbook, 4th Edition, Volume 3, 2002, Auerbach Publications.
