Most functions of DP-900 exam questions and answers are same with soft version, You can read any DP-900 exam material on PDF reader, Fast DP-900 dumps download after your payment.

**NEW QUESTION: 1** Ari Gaunt was affiliated with Savvy Investments and was terminated after some of the female representatives associated with Savvy filed sexual harassment complaints against him. Mr. Gaunt believes that he is still due money for some transactions he executed prior to his termination; Savvy believes otherwise. Under FINRA's Code of Arbitration: **A.** Ari may either sue Savvy in a civil court of law or submit his claim to arbitration. **B.** Ari has six years to submit his claim to arbitration. **C.** both B and C are true statements. **D.** if Ari submits his claim for arbitration and is unhappy with the panel's decision, he can then sue Savvy in a civil court of law. **Answer: B** Explanation: If Mr. Gaunt believes he is still due money from Savvy, and Savvy disagrees, Ari has six years to submit his claim to arbitration under FINRA's Code of Arbitration. Ari cannot sue Savvy in a court of law, and the decision of the arbitration panel is final.

**NEW QUESTION: 3** Which two things should the Development Team do during the first Sprint? (Choose two.) **A.** Make up a plan for the rest of the project. **B.** Define the major product features and release plan architecture **C.** Develop at least one piece of functionality. **D.** Analyze, describe, and document the requirements for the subsequent Sprints. **E.** Create an increment of potentially releasable software. **Answer: C, E**

**NEW QUESTION: 4** DRAG DROP You maintain a SQL Server database that is used by a retailer to track sales and salespeople. The database includes two tables and two triggers that is defined by the following Transact-SQL statements: During days with a large sales volume, some new sales transaction fail and report the following error: Arithmetic overflow error converting expression to data type int. You need to ensure that the two triggers are applied once per sale, and that they do not interfere with each other. How should you complete the relevant

Transact-SQL statement? To answer, drag the appropriate Transact-SQL segments to the correct location or locations. Each Transact-SQL segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Select and Place:

**Answer:** Explanation: Explanation/Reference: Box 1: OFF Box 2: 0 Only direct recursion of AFTER triggers is prevented when the RECURSIVE\_TRIGGERS database option is set to OFF. To disable indirect recursion of AFTER triggers, also set the nested triggers server option to 0.

Note: Both DML and DDL triggers are nested when a trigger performs an action that initiates another trigger. These actions can initiate other triggers, and so on. DML and DDL triggers can be nested up to 32 levels. You can control whether AFTER triggers can be nested through the nested triggers server configuration option. If nested triggers are allowed and a trigger in the chain starts an infinite loop, the nesting level is exceeded and the trigger terminates.
