NEW QUESTION: 1 Which two statements are true after rolling back an application module? (Choose two.)
A. Any attribute changes to entity objects for the associated view objects of the application module are reset to their original values.
B. The associated view object iterators for the application module have their current row indicators reset to the first row.
C. All entity object caches for the associated view objects of the application module are emptied.
D. New or deleted records are unaffected by the rollback.
E. The application module is passivated.
Answer: A, C
Explanation: Explanation/Reference: A rollback rolls back the transaction. It discards all changes.
Incorrect Answers: D: The passivated state will be removed when a transaction commit/rollback occurs.
