**NEW QUESTION: 1A. Option DB. Option AC. Option BD. Option CAnswer: B**Explanation:  
<https://www.cisco.com/c/dam/en/us/products/collateral/software/one-software/idcsoftware-strategy-paper.pdf>

**NEW QUESTION: 2**What is done with counter parties confirmations?**A.** They are matched as soon as possible after receipt**B.** They are archived after reception**C.** They are forwarded to the deal capturer to check the completeness of the deal**D.** They are scanned for money laundering activities and afterwards destroyed**Answer: A**

**NEW QUESTION: 3**You are an app maker.You want to create apps and track customizations as part of the default solution.You need to determine the impact of performing the work in the default solution.What should you conclude?**A.** The prefix used when creating components as part of the default solution can be set to a specific value.**B.** The default solution cannot be exported and distributed to another environment.**C.** The default solution does not contain all components and customizations from all solutions in the environment.**Answer: B**Explanation: Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system. Why you shouldn't use the default solutions to manage customizationsThere are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:\* The default solution can't be exported; therefore, you can't distribute the default solution to another environment.The default solution contains all components and customizations from all solutions in the environment.By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.It's difficult to locate or identify the customizations you've made in the environment by using either default solution.When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.Reference:
