Option B****B. Option D****C. Option A****D. Option C****Answer: B**

Explanation:* Object.prototype.constructorReturns a reference to the Object function that created the instance's prototype. Note that the value of this property is a reference to the function itself, not a string containing the function's name. The value is only read-only for primitive values such as 1, true and "test".* The constructor property is created together with the function as a single property of func.prototype.Reference: Object.prototype.constructor
