**NEW QUESTION: 4** SIMULATION Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. When you are finished performing all the tasks, click the 'Next' button. Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam. Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. Your company plans to host in Azure the source files of several line-of-business applications. You need to create an Azure file share named corpsoftware in the storage lod8322489 storage account. The solution must ensure that corpsoftware can store only up to 250 GB of data. What should you do from the Azure portal?  
**Answer:** Explanation: See explanation below. Explanation  
Step 1. Go to the Storage Account blade on the Azure portal: Step 2. Click on add File Share button: Step 3. Provide Name (storagelod8095859) and Quota (250 GB). References:  
<https://docs.microsoft.com/en-us/azure/storage/files/storage-how-to-create-file-share>
