Moping won't do any good, H19-338 Exam preparation materials may be one of potential important conditions.

NEW QUESTION: 1A company plans to implement solutions that use Common Data Service as a data storage.You need to recommend features to meet the company's needs.Which features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.NOTE: Each correct selection is worth one point.

Answer: Explanation:ExplanationBox 1: business rulesYou can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.Box 2: business process flowsFlows Power Automate includes several types of processes, each designed for a different purpose:* Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.* Button flows. Perform repetitive tasks simply by tapping a button on your mobile device.* Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.* Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.* Workflows and actions. Dynamics 365 customizers may be familiar with the classic Common Data Service processes, which are workflows and actions.Box 3: Common Data ModelModel-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.Reference:

NEW QUESTION: 2Compared to a centralized distribution network strategy, an organization using a decentralized distribution network strategy can usually expect:**A.** higher cost of transportation and lower warehousing cost.**B.** lower cost of lost sales and higher inventory cost **C.** higher cost of lost sales and higher inventory cost.**D.** lower cost of transportation and lower warehousing cost.**Answer: D**

NEW QUESTION: 3**A.** The quantity in Column A is greater;**B.** The relationship cannot be

determined from the information given.**C.** The quantity in Column B is greater;**D.** The quantities are equal;**Answer: A**Explanation:Explanation/Reference:Explanation:To add two fractions having a common denominator, you add numerators - not denominators. Hence,.You'll find that it's impossible to equate with and so the two quantities cannot be equal.Since $x > 0$, you can cancel across columns, leaving an inequality in which Quantity Quantity B:
