How terrible, It is believed that no one is willing to buy defective products, so, the D-XTR-OE-A-24 study materials have established a strict quality control system.

For instance, our D-XTR-OE-A-24 exam questions fully accords with your requirements, Besides, if you have any question and doubt about D-XTR-OE-A-24, you can consult our service.

NEW QUESTION: 1The server has two network cards. The driver for the first card is the module 8139too and the driver for the second card is the module ne2k-pci. How is it possible to ensure that the card using the 8139too driver is detected before the card using the ne2k-pci driver?
A. install mod 8139too; install mod ne2k-pci
B. modprobe 8139too dev=eth0; modprobe ne2k-pci dev=eth1
C. modprobe 8139too; modprobe ne2k-pci
D. ifconfig modadd eth0=8139too, eth1=ne2k-pci
E. modprobe eth0=8139too, eth1=ne2k-pci
Answer: B

NEW QUESTION: 2Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that has the Windows Server Update Services (WSUS) server role installed. You have several client computers that are not members of the domain. The client computers are currently part of the Unassigned Computers group. On the client computers, you set the WSUS target group to WSUS_Group1, and then you run wuaclt /resetauthorization /detectnow. You discover that all of the client computers are still members of the Unassigned Computers group. You need to ensure that the client computers immediately become members of a computer group named WSUS_Group1. What should you do? (Each correct answer presents part of the solution. Choose two.)
A. On Server1, create a new security group.
B. Create a new WSUS computer group.
C. On Server1, run wuaclt /resetauthorization /detectnow.
D. On all of the client computers, run wsusutil /reset.
E. On Server1, run wsusutil /reset.
F. On all of the client computers, run wuaclt /resetauthorization /detectnow.
Answer: B, F
Explanation:Note: *By default, the WSUS server is set to use server-side targeting. If you are using client-side targeting, you need to set an option on the WSUS server. *By default, each computer is already assigned to the All Computers group. Computers will also be assigned to the Unassigned Computers group until you assign them to another group. Regardless of the group you assign a computer to, it will also remain in the All Computers group. A computer can be in only one other group in addition to the All Computers group.

NEW QUESTION: 3The sales operations team has requested a new custom object with the following requirements: The Sales Managers should have full access to all records created. The object's sharing default should be set to Private No new sharing rules should be created Which two options can the system administrator setup for the security for this object? Check 2 answers.
A. Create a Permission set for all Sales Manager users with "modify all" checked for the Object
B. Create a Record Type with "modify all" checked, and assign this Record Type to the Sales Manager Profile
C. Create a rule for all Sales Manager users with "modify call" checked for the object.
D. Add the "modify all" permission to the Sales Manager Profile for the new Object
Answer: B, D
