NEW QUESTION: 1What would you set in your CloudFormation template to fire up different instance sizes based off of environment type? i.e. (If this is for prod, use m1.large instead of t1.micro)**A. MappingsB. OutputsC. ResourcesD. conditions****Answer: D****Explanation:**Explanation The optional Conditions section includes statements that define when a resource is created or when a property is defined. For example, you can compare whether a value is equal to another value. Based on the result of that condition, you can conditionally create resources. If you have multiple conditions, separate them with commas.For more information on Cloudformation conditions please visit the below link<http://docs>
